Key word : Speech Act, Illocutionary Acts, Divergent Movie.

Speech act is a theory which analyze the role of utterances in relation to the behaviour of speaker and hearer in interpersonal communication. Indeed, the term “speech act” usually interpreted or meant illocutionary utterances. Illocutionary act is what the speaker is doing by uttering the words, it show the fuction of the words, the specific purpose that the speakers have in mind. The illocutionary act is performed via communicative force of an utterance. The aim of this research is to analyze the utterances done by the main actor in “Divergent Movie” based on the illocutionary act types. There are five types of illocutionary act: Representatives, Directives, Commissives, Expressives and Declarations.

This research was carried out by applying descriptive qualitative design. The main data were taken from the script of “Divergent” movie. The data were collected through documentation. The writer used content analysis in analysing the data according to speech act theory of J.L Austin and John Searle.

The result showed that there were five illocutionary act types found in this study. Those were: Representatives with total amount 96 utterances (28,24%) contained paradigm cases of denying, asserting, and accusing; Directives with total amount 125 utterances (36,76%) contained paradigm cases of asking, begging, commanding, requesting, prohibiting, suggesting, and instructing; Commissives with total amount 25 utterances (7,35%) contained paradigm cases of committing, predicting, and refusing; Expressives with total amount 39 utterances (11,47%) contained paradigm cases of complaining, surprising, protesting, amazing, thanking, leave taking, greeting, apologizing, praising, regretting and liking; Declarations with total amount 55 utterances (16,18%) contained paradigm cases of declaring, approving and naming.

CHAPTER I

INTRODUCTION

A. Background of the Study

Only human kind is blessed with ‘language capacity’ (The Language Acquisition Device or LAD), an essentially unique quality.¹ Unlike animals’ sounds, the human language can sound as simple as well as so complex.² Every feature of language can be an object of intellectual interests. In the modern study of language, any meanings, forms, and functions of language are carefully, extensively, and deeply explored to develop the scientific study language, named linguistics.³

Linguistics is the study that contains all about human languages. It means linguistics is primarily concerned with the uniquely human capacity to express ideas and feelings by voluntarily produced sounds or their equivalent, such as as gestures in sign languages used by deaf person. Linguistics can be broadly defined as the scientific study of language or of particular languages.

The fields of linguistics encompasses a wide range of “ways” to study language, which are reflected in the subdivision of linguistics into branches (or

subfields). Pragmatics, is one of branches of linguistics have been appeared in recent years and decades. It is the study of meaning in context.⁴

Pragmatics is the systematic study of how people understand and communicate more than the literal meaning of words or sentences when they speak, write or gesture, or, in more general terms, when they interpret and produce what linguists call utterances. Utterances are spoken, written or gestured contributions within a particular social context that derive their meaning partly from that context. Therefore, pragmatics is also called the study of utterance meaning, or meaning in context, or meaning in interaction.⁵

The utterance itself means an utterance is any stretch of talk, by one person, before and after which there is a silence on the part of that person. An utterance is the use by a particular speaker, on a particular occasion, of a piece of language, such as a sequence of sentences, or a single phrase, or even a single word.⁶ In attempting to express themselves, people do not only produce utterances containing grammatical structures and words, they perform actions via those utterances. It is generally called by speech act.⁷

Crystal states that speech act is a term proposed by J.L Austin referring to “a theory which analyses the role of utterances in relation to the behaviour of

speaker and hearer in interpersonal communication”.⁸ In communication, speakers use a variety of speech act to show their communicative purpose. Jacob L.Mey stated:

“Speech act are verbal action happening in the world. Speech acts are ways of doing things with our words – our words work for us in speech acts. But how these words work, and how or where these speech acts are used (such as in conversation), is not immediately evident, and cannot at any rate be derived from a formal framework, in the way that all and only the correct sentences are supposed to be derived by a grammar.”⁹

According to that statement, it can be concluded that speech act express action verbally or through words in which those words follow grammar rules.

Speech acts can be done in writing, not only in speaking; for instance, would be equally appropriate printed in a card or spoken. The utterances based on single sentences. The sentence is the level of language that speech acts are tied to, which means that an average ceremonial speech or political speech is not a speech act, but a sequence of speech acts.¹⁰

Austin in Mc Kay and Horberger explored three kinds of speech meaning, they are locutionary, illocutionary, and perlocutionary. One of three dimensions, the most discussed is illocutionary. Indeed, the term “speech act” usually interpreted or meant illocutionary utterances.¹¹

Illocutionary act called the act of doing something. Illocutionary act is the function of the word, the specific purpose that the speakers have in mind.¹² The illocutionary act is performed via the communicative force of an utterance. We might utter, “*I have just made some coffee*”, to make a statement, an offer, an explanation, or for some other communicative purpose.¹³ Illocutionary act is very important in part of speech act because illocutionary act becomes the main central to linguistics in elements of communication. Illocution is what the speaker is doing by uttering those words: commanding, offering, promising, threatening, thanking, etc.¹⁴ Based on the speech act theory, the researcher going to analyze the illocutionary act types done by the main character in Divergent Movie.

Movies, also known as films, are a type of visual communication which use moving pictures and sound to tell stories or inform (help people to learn).¹⁵ The visual media can take students places they could never visit, help them see things they might never experience, and make the things they have read about come alive. Good films and videos can be very effective in arousing interest and motivating students. When it used effectively, films and videos can be powerful learning aids. Selecting the right video is crucial. It must clearly fit into the lesson, not simply be an add on or time killer. It is only a tool for helping attain

the instructional objective. A good film or videotape does not replace good teaching; it complements it.¹⁶ The Divergent movie contains many kinds of utterances and many types of expression that belong to Illocutionary act types from the dialogues. It can be used as supplementary material in a certain expression for EFL students in teaching and learning process.

Divergent is a 2014 American science fiction action movie directed by Neil Burger, based on the novel of the same name by Veronica Roth. The movie is the first installment in The Divergent Series and was produced by Lucy Fisher, Pouya Shabazian, and Douglas Wick, with a screenplay by Evan Daugherty and Vanessa Taylor. Divergent was released on March 21, 2014 in the United States.¹⁷ The researcher appreciates this movie as impressing and interesting movie from the beginning to the end. This movie has balanced aspect from drama, excavation characters, romance until the action scenes. The concept is unique, it inserts the social issues well and packed such a way so easier the audience to catch the movie intention. The plot is interesting and intriguing so do not make the audience feel bored. Moreover, the figure of divergent in this movie inspire to be brave being different and bring the positive changes for the better future. Thus, the researcher feel interested to choose this movie as a data to be analyzed.

Based on the explanation above, the researcher conducts a research entitled “AN ANALYSIS OF ILLOCUTIONARY ACTS IN “*DIVERGENT*” MOVIE SCRIPT”. This study explores the types of illocutionary acts from the movie script of *Divergent* movie. It focussed on the types of illocutionary acts and its paradigm cases within the utterances done by the main characters in this movie.

B. Statement of the Problems

1. What are the types of illocutionary acts found in the “*Divergent*” movie script?
2. What are the paradigm cases found in the “*Divergent*” movie script?

C. Objectives of the Study

1. To analyze the types of illocutionary acts found in the “*Divergent*” movie script.
2. To analyze the paradigm cases found in the “*Divergent*” movie script.

D. The Significances of the Study

This research is expected to be benefical in both theoritical and practical usage.

1. Theoretical Benefit

The benefit in the study is expected to be beneficial to the development of literary study and the complement to the study of “Divergent” movie. This research is intended to enrich the new knowledge about the types of illocutionary acts and to add the pragmatics study especially on speech acts study.

2. Practical Benefit

This study is intended to find out the kinds of illocutionary acts along with its paradigm cases used in the dialogue of “Divergent” movie. It is to increase the understanding about the types of illocutionary acts, especially for writer and commonly for reader. The writer also expects that the viewer of “Divergent” movie can take the meaning and the main point of the utterances in this movie.

E. Previous Research Finding

There are three previous research findings related to this research. The first previous research findings is the thesis of Fitri Kumalasari from Andalas University Padang in 2011 entitled The Types Illocutionary and Perlocutionary Acts as Found in An American Movie Entitled Grown Ups. In this thesis, there are twenty six data were analyzed. The writer classifies the types of illocutionary acts and perlocutionary acts from the main character of the Grown Ups movie. From the five types of illocutionary acts that proposed by Searle, the writer just

finds four types of illocutionary acts. They are: directive for 11 (eleven) times (46%), assertive for 7 (seven) times (29%), expressive for 4 (four) times (17%) and commissive for 2 (two) times (8%). The writer discovers that an occurrence of directive is mostly dominant.¹⁸

The differences between the thesis and this study is this thesis analyzed the types of perlocutionary and the illocutionary acts while this study focused on the types of illocutionary acts in the movie

The second is presented by Mariyani entitled “ A Descriptive Analysis of Speect Act on Movie Manuscript Entitle Freaky Friday”. In this research, she analyzed sentences used in “Freaky Friday” the movie. She found there are many speech acts types in the movie, as follow” 117 direct speech acts. 58 indirect speech acts, 65 literal speech acts, 54 non literal speech acts, 138 direct-literal speech acts, 57 direct non literal speech acts, 51 indirect-literal speech acts and 10 indirect-non literal speech acts. Besides, she found illocutionary acts according Searle as follows: 47 representatives utterances, 62 directive utterances, 31 commissive utterances, and 58 declaration utterances.¹⁹

The third was written by Nur Hasanah, a student of the English Education Departement, STAIN Ponorogo entitled “An Analysis of Speech acts in “Up” movie by Pete Docter”. That research result are: (1) the categories of speech

acts are used in the “Up” movie include directive(35%), representative (19%), commissive (8%), expressive (29%), and declarative (9%).²⁰

The second and the third previous study focused on analysis of kinds of speech acts generally while in this study the researcher will focus on the types of illocutionary acts along with its paradigm cases in the Divergent movie.

F. Research Methodology

1. Research Approach

To analyze the research problem in this thesis, the researcher used the descriptive qualitative design. The descriptive qualitative design doesn't intend to find a new theory but to find a new evidence to prove the theory. Qualitative research is descriptive in that the researcher is interested in process, meaning, and understanding gained through words or pictures.²¹ In qualitative research, the researcher collects and analyzes data simultaneously to draw a temporary conclusion and repeats the cycles several times, deciding what data needs to be collected again to verify their temporary conclusion.²²

In this research, the researcher used this approach to analyze the movie script of Divergent in the form of dialogues to point out the types of

illocutionary act and its paradigm cases according to the researcher personal experience in making interpretations.

2. Data Source

In qualitative research, sources of data are assumed to be homogeneous, having no variation. Therefore, the trustworthy source of data does not come from representation of different groups of the source, but selected based on certain criteria to find the most authoritative one.²³

a. Primary Data Source

The primary data source of this study was taken from the movie script of “Divergent” directed by Neil Burger. The movie was released on March 21, 2014 in the United States.

b. Secondary Data Source

The secondary data source were book, essays, articles and internet related to “Divergent” movie.

3. Technique of Data Collection

According to Patton in Emzir, there are three kinds of data in qualitative research, that are interviews, observation, and document. Document is written materials and other documents from organizational, clinical programs records; memoranda and coinformance; official publications and reports; personal diaries, letters, artistic works, photographs and memorabilia; and written responses to open-ended surveys. Data consist

²³ Ibid.,

of excerpts from documents, captured in a way that records and preserves context.²⁴

Based on explanation above, the researcher used documentation to collect the data. This technique was used because the object of the research is the movie script of Divergent movie. The data of this study were the types of illocutionary act in the movie script of Divergent movie. The steps were as follow:

- a) Reading and observing the dialogue in the script.
- b) Watching, understanding the meaning and catch the main important point from each dialogue in the movie.
- c) Collecting the data by classifying it into the types of illocutionary acts through Coding. It is done to give code for each type of illocutionary acts:
 - 1) Representatives with code Re
 - 2) Directives with code Di
 - 3) Commissives with code Co
 - 4) Expressives with code Ex
 - 5) Declarations with code De

4. Technique of Data Analysis

In this research, the researcher uses content analysis to analyze the data. Content analysis is one of numerous research methods used to analyze text data. Content analysis is defined as a research method for the subjective

interpretation of the content of text data through the systematic classification process of coding and identifying themes or patterns.²⁵

Research using qualitative content analysis focuses on the characteristics of language as communication with attention to the content or contextual meaning of the text. These categories can represent either explicit communication or inferred communication. The goal of content analysis is “to provide knowledge and understanding of the phenomenon under study”.²⁶

The process of analyzing data using content analysis techniques was formulated as the following steps:

- a) Watching the movie for several times.
- b) Reading and observing the movie script and the movie.
- c) Classifying the illocutionary acts based on its paradigm cases.
- d) Drawing the the conclusion from the result of the analysis.

REVIEW OF RELATED LITERATURE

A. Speech Act Theory

It was the British philosopher, J.L Austin (1962) who made very explicit for the first time that there are many different things which speakers can do with words. His most basic insight that some utterances are not statements or question about some piece of information, but are action.²⁷ It is called speech act.

Crystal states that speech act is a term proposed by J.L Austin referring to “a theory which analyses the role of utterances in relation to the behaviour of speaker and hearer in interpersonal communication”.²⁸

The basic law in such thinking is that it does not pay attention to language as an activity which produces speech acts, defined as “the basic or minimal units of linguistic communication” (Searle in Jacob L.Mey). As Searle puts it, “ The unit of linguistic communication is not, as has generally been supposed, the symbol, word or sentence,.....but rather the production of the symbol or word or sentence in the performance of the speech act”.²⁹

²⁷Michael Stubbs, *Discourse Analysis: The Sociolinguistic Analysis of Natural Language*, (England: Basil Blackwell Publisher Limited,1983), 147

²⁸Soekemi, *Semantics : A Work Book*, (Surabaya: Universitas Kristen Petra,1996), 128

²⁹ Jacob L.Mey, *Pragmatics :An introduction* (UK. Blackwell publishing 2001), 95

Speech act theory said that the action performed when an utterance is produced can be analyzed on three different levels.³⁰ The first is locutionary act, which is the basic of utterance, or producing a meaningful linguistics expression. The second is illocutionary act, which is performed via the communication force of an utterance. The third is perlocutionary act, which is creating utterances with a function intending it to have an effect.³¹

Illocutionary act is a very important part of speech act because illocutionary act itself becomes the main central to linguistic elements of communication.³² Searle uses mix of criteria to establish these different types, including the act's illocutionary point; its 'fit' with world; the psychological state of speaker; and the content of the act. The illocutionary point is the purpose or aim of the act. This is the five main types of illocutionary act:³³

1. Representatives

Representatives commit the speaker to the truth of the expressed proposition (paradigm cases : asserting, concluding). These speech acts are assertions about a state of affairs in the world (hence they also called assertives) and thus carry values 'true' or 'false'. This is their 'point'; as to 'fit', they should, of course, match the world in order to be true. Assertions often, maybe even always, represent a subjective state of mind: the speaker

³⁰ Joan Cutting, *Pragmatics and Discourse* (London and New York: Routledge, 2002), 16

³¹ George Yule, *Pragmatics* (New York : Oxford University Press, 1996), 47

³² Ibid.,53

³³ John I. Saeed. *Semantics* (UK. Blackwell publishing. 2009), 239-240

who asserts a proposition as true does so in force of his or her belief. The belief may have different degrees of 'force'. For examples: (a) The earth is flat, (b) It was a warm sunny day

2. Directives

Directives are attempt by the speaker to get the addressee to do something (paradigm cases : requesting, questioning). As the name says, these speech acts embody an effort on the part of the speaker to get the hearer to do something, to direct him or her towards some goals. This is their illocutionary point; at the extreme end of this category, we have the classical imperatives. As to the 'fit' that these speech act represent , there is also a clear 'direction' in the technical sense of this term, from world to words: the world is adapted to the uttered words. Thus imperatives (at least attention) change the world in that they (hopefully) make things happen in accordance with my wish. Directives differ in force from pious wish to peremptory, harsh order. Austin places them under either 'exercitives' or 'behabitives'. For examples: (a) Could you lend me a pen, please? (b) Don't touch that.

3. Commisives

Commisives commit the speaker to some future course of action (paradigm cases : promising, threatening, offering). Commisives operate a change in the world by means of creating an obligation; however, this obligation is created in the speaker, not in the hearer, as in the case of the directives. As an instance, compare the difference between a request and a

promise: the first is a directive, the second a commissives. As to their 'direction of fit', they are identical (world adapted to words). However, the 'locus' of the obligation created is different: whereas the promise creates an obligation in the promiser, the request does so in the 'requiree'. For examples: (a) I'll be back, (b) I'm going to get it right next time.

4. Expressives

This speech act express a psychological state (paradigm cases : thanking, apologizing, welcoming, congratulating). It expresss an inner state of the speaker; the expression is essentially subjectives and tell us nothing about the world. Saying 'Excuse me' when stepping on a person's toe has nothing to do, causally or in terms consequence, with the act of stepping as such: the words 'Excuse me' do not change anything here, done is done, and both stepper and 'steppee' willl have to live with the change in world conditions that a stepped-on toe represent. In this sense, the criterion of 'fit' cannot be said to operate.

5. Declarations

Declarations effect immediate changes in the institutional state of affairs and which tend to rely on elaborate extralinguistic institutions (paradigm cases : excommunicating, declaring war, christening, marrying, firing from employment). This is Austin 'original' category; the declarartive speech act in "I declare this bridge to be opened" changes the state of affairs

in the world with respect to the bridge. What earlier was a ‘not yet opened’ bridge now becomes an opened bridge.³⁴

B. Movie

1. Definition of Movie

Movies, also known as films, are a type of visual communication which use moving pictures and sound to tell stories or inform (help people to learn). People in every part of the world watch movies as a type of entertainment, a way to have fun. For some people, fun movies can mean movies that make them laugh, while for others it can mean movies that make them cry, or feel afraid. Most movies are made so that they can be shown on big screens at cinemas or movie theatres. After movies are shown on movie screens for a period of time (ranging from a few weeks to several months), movies are shown on pay television or cable television, and sold or rented on DVD disks or videocassette tapes, so that people can watch the movies at home. You can also download or stream movies. Later movies are shown on television stations.

A movie camera or video camera takes pictures very quickly, usually at 25 pictures (frames) every second. When a movie projector, a computer, or a television shows the pictures at that rate, it looks like the things shown in the set of pictures are really moving. Sound is either recorded at the same time, or

³⁴ Jacob L.Mey, *Pragmatics :An introduction* (UK. Blackwell publishing 2001), 120-123

added later. The sounds in a movie usually include the sounds of people talking (which is called dialogue), music (which is called the "soundtrack"), and sound effects, the sounds of activities that are happening in the movie (such as doors opening or guns being fired). In the 20th century the camera used photographic film. The product is still often called a "film" even though there usually is no film.³⁵

2. Genre of movie

A genre is a word for a type of movie or a style of movie. Movies can be fictional (made up), or true, or a mix of the two. Although hundreds of movies are made every year, there are very few that do not follow a small number of set plots, or stories. Some movies mix together two or more genres.

- a. Action movies have a lot of exciting effects like car chases and gun fights, involving stuntmen. They usually involve 'goodies' and 'baddies', so war and crime are common subjects. Action movies usually need very little effort to watch, since the plot is normally simple. For example, in Die Hard, terrorists take control of a skyscraper and ask for a big ransom in exchange for not killing the hostage workers. One hero somehow manages to save everyone. Action movies do not usually make people cry, but if the action movie is also a drama, emotion will be involved.
- b. Adventure Movies usually involve a hero who sets out on a quest to save the world or loved ones.

³⁵ <https://simple.wikipedia.org/wiki/Movie>, accessed on 7th January, 2015 at 14.00 PM

- c. Animated movies use artificial images like talking pigs to tell a story. These movies used to be drawn by hand, one frame at a time, but are now made on computers.
- d. Buddy movies involve 2 heroes, one must save the other, both must overcome obstacles. Buddy movies often involve comedy, but there is also some emotion, because of the close friendship between the 'buddies'.
- e. Comedies are funny movies about people being silly or doing unusual things or being in silly or unusual situations that make the audience laugh.
- f. Documentaries are movies that are (or claim to be) about real people and real events. They are nearly always serious and may involve strongly emotional subjects, for example cruelty.
- g. Dramas are serious, and often about people falling in love or needing to make a big decision in their life. They tell stories about relationships between people. They usually follow a basic plot where one or two main characters (each actor plays a character) have to 'overcome' (get past) an obstacle (the thing stopping them) to get what they want.
- h. Tragedies are always dramas, and are about people in trouble. For example, a husband and wife who are divorcing must each try to prove to a court of law that they are the best person to take care of their child. Emotion (feelings) are a big part of the movie and the audience (people watching the movie) may get upset and even cry.

- i. Film noir movies are 1940s-era detective dramas about crime and violence.
- j. Family movies are made to be good for the entire family. They are mainly made for children but often entertaining for adults as well. Disney is famous for their family movies.
- k. Horror movies use fear to excite the audience. Music, lighting and sets (man-made places in movie studios where the movie is made) are all designed to add to the feeling.
- l. Romantic Comedies (Rom-Coms) are usually love stories about 2 people from different worlds, who must overcome obstacles to be together. Rom-Coms are always light-hearted, but may include some emotion.
- m. Science fiction movies are set in the future or in outer space. Some use their future or alien settings to ask questions about the meaning of life or how we should think about life. Science fiction movies often use special effects to create images of alien worlds, outer space, alien creatures, and spaceships.
- n. Thrillers are usually about a mystery, strange event, or crime that needs to be solved. The audience is kept guessing until the final minutes, when there are usually 'twists' in the plot (surprises).
- o. Western movies tell stories about cowboys in the western United States in the 1800s. They are usually really Action movies, but with historical costume. They may or may not involve Indians (Native Americans).

- p. Suspense. These are movies that keep you on the edge of your seat. They usually have multiple twists that confuse the watcher.
- q. Fantasy. Fantasy movies include magical and impossible things that any real human being cannot do.³⁶

C. Divergent Movie

Divergent is a 2014 American science fiction action film directed by Neil Burger, based on the novel of the same name by Veronica Roth. The film is the first installment in The Divergent Series and was produced by Lucy Fisher, Pouya Shabazian, and Douglas Wick, with a screenplay by Evan Daugherty and Vanessa Taylor. The stars are Shailene Woodley, Theo James, Ashley Judd, Jai Courtney, Ray Stevenson, Zoë Kravitz, Miles Teller, Tony Goldwyn, Ansel Elgort, Maggie Q and Kate Winslet. The story takes place in a dystopian and post-apocalyptic Chicago where people are divided into distinct factions based on human virtues. Beatrice Prior is warned that she is Divergent and thus will never fit into any one of the factions and soon learns that a sinister plot is brewing in her seemingly perfect society.

Development of Divergent began in March 2011 when Summit Entertainment picked up the film rights to the novel with Douglas Wick and Lucy Fisher's production company Red Wagon Entertainment. Principal photography

³⁶ <https://simple.wikipedia.org/wiki/Movie>, accessed on 7th January, 2015 at 14.00 PM

began April 16, 2013 and concluded on July 16, 2013, with reshoots taking place from January 24–26, 2014. Production mostly took place in Chicago.

Divergent was released on March 21, 2014 in the United States. The film received mixed reviews from critics, with praise going towards its performances, and criticism focused on its execution. Reviewers found the film to be generic and unoriginal, comparing it unfavorably to other young-adult fiction adaptations. Despite this, the film was a financial success as it reached the first spot at the box office during its opening weekend. After its release, the film earned over US\$288 million worldwide against its budget of US\$85 million. It was released on DVD and Blu-ray on August 5, 2014.

1. The Plot of *Divergent* Movie

In a futuristic dystopian Chicago, society is divided into five factions: Abnegation (the selfless), Amity (the peaceful), Candor (the honest), Dauntless (the brave), and Erudite (the intellectual). The remaining population are the Factionless, who have no status or privilege in this society. When children reach the age of 16, they undergo a serum-induced psychological test which indicates their best-suited faction, then are allowed to choose any faction as their permanent group at the subsequent Choosing Ceremony.

Beatrice Prior (Shailene Woodley) was born into Abnegation, which runs the government. Her father, Andrew Prior (Tony Goldwyn), serves on the ruling council along with the head of Abnegation, Marcus Eaton (Ray Stevenson). Beatrice takes her test with a Dauntless woman named Tori Wu

(Maggie Q) as her proctor. Her results show equal attributes of multiple factions, meaning she is Divergent. Her divergence includes Abnegation, Erudite, and Dauntless. Tori records her results as Abnegation and warns her to keep the true result a secret, saying that because Divergents can think independently and the government therefore cannot control them, they are considered threats to the existing social order.

The next day at the Choosing Ceremony, Beatrice's brother Caleb Prior (Ansel Elgort) chooses Erudite, while after some hesitation, Beatrice chooses Dauntless. After the ceremony, Beatrice meets Christina (Zoë Kravitz), Al (Christian Madsen), and Will (Ben Lloyd-Hughes), three other initiates from other factions who also chose Dauntless. Christina and Al are from Candor and Will is from Erudite. The initiates' commitment and fearlessness are immediately tested, and Eric Coulter (Jai Courtney), a brutal Dauntless leader, makes it clear that anyone not meeting Dauntless' high expectations will be expelled from the faction. Beatrice is the first to volunteer for a leap of faith from a tall building into a dark hole, landing in a net. When Four (Theo James), a transfer initiates' instructor, asks her name, she decides to shorten it to "Tris."

Tris initially struggles in Dauntless training, ranking far below the cutoff after the first evaluation, but with Four's help slowly improves. Eric matches her against her nemesis — Peter (Miles Teller) in a fight. Tris is soundly defeated and ends up in the infirmary. When she discovers that she

will miss the most important test, Capture The Flag, she leaves the infirmary and joins the other initiates, secures her team's victory, and makes the final cut.

In the next phase of training, the initiates are subject to psychological simulations where they face their worst fears. Tris' divergence allows her to excel at the tests, defeating them in unusual ways, but Four warns her to hide her abilities and solve the challenges as a normal Dauntless would. Divergents can also manipulate tests and serums.

Tris visits Caleb, who tells her that Erudite is planning to overthrow Abnegation and become the ruling faction. On her return to Dauntless headquarters, Tris is attacked by Al, Peter, and Drew before being rescued by Four. The next day Al pleads with Tris for her forgiveness but she refuses, calling him a coward. He later kills himself by jumping into "The Chasm" rather than face failure.

To prepare her for the final test, Four takes Tris into his own fear simulations, where she learns that his real name is Tobias Eaton, the son of Marcus Eaton. After the simulation, they kiss. Tris then passes her test and is officially initiated into the Dauntless. The rest of the Dauntless are then injected with a serum supplied by Erudite which is supposedly for tracking, but is actually for mind control.

The next morning, the Dauntless prepare to execute Abnegations by the orders of the Erudites. Divergents are unaffected by the new serum, so

Tris must blend in to avoid suspicion. She finds Four, who reveals himself to be a Divergent. While the Dauntless move to raid Abnegation, Tris and Four separate from the group and attempt to locate Tris' parents, but Eric sees that Four is not under control and captures the two. Four is taken into custody while Tris is ordered to be executed. Her mother Natalie (Ashley Judd) appears and saves her but is shot and killed as they try to escape.

Tris finds her father in hiding with Caleb, Marcus, and several Abnegations. The group sneaks into the Dauntless headquarters, where Tris encounters Peter and forces him to lead them to Erudite's control center. Her father sacrifices himself in a shootout, and Tris goes in alone to find Four, who is now under stronger mind control and attacks her. Using her knowledge of his fears, she manages to wake him from the mind control and the two enter the central control room, where Erudite leader Jeanine (Kate Winslet) is about to have the Dauntless army execute the entire Abnegation faction. Tris uses a sample of the mind control serum on her to force her to cancel the program. The group escapes the compound and boards a train out of the complex.³⁷

2. The Synopsis of Divergent Movie

Tris Prior (Shailene Woodley) lives in a futuristic world in which society is divided into five factions. As each person enters adulthood, he or

In using a representatives, the speaker makes words fit the world (of belief). It states the what the speaker believes to be case or not. Statements of fact, assertions, conclusions and descriptions.³⁹ In this research, researcher found 96 utterances in the type of representatives illocutionary act in paradigm cases of denying, asserting, and accusing.

a. Denying

Denying is expression to say that something is not true.⁴⁰ It included the representatives illocutionary act because the speaker denied the statement that unsuitable with the fact.

b. Asserting

Asserting is expression to say a strong statement.⁴¹ The assertions expressed proposition make the words fit the world according to the state of affairs in the world.

c. Accusing

Accusing is expression to say that somebody has done wrong, broken the law, is to be blame.⁴² The paradigm case of accusing also

CHAPTER IV

CONCLUSION

A. Conclusion

Based on the data analysis and discussion previously presented, there were two points to be concluding related to the problem of this research:

1. There were five illocutionary act types found in this movie script of “*Divergent*” movie based on the theory of Austin (1962) and Searle (1979), that are Representatives, Directives, Comissives, Expressives and Declarations. All of the illocutionary act types were spread on 1117 utterances in the script. As the important one, the reseacher found 340 illocutionary acts done by Tris as the main actor in Divergent movie. It was consist of 96 illocutionary acts (28,24%) in the type of Representatives, 125 illocutionary acts (36,76%) in the type of Directives, 25 illocutionary acts (7,35%) in the type of Comissives, 39 illocutionary acts (11,47%) in the type of Expressives and 55 illocutionary acts (16,18%) in the type of Declarations. The researcher discovered that an occurrence of directives is mostly dominant.
2. The paradigm cases of illocutionary acts found in this movie script were as follows:
 - a. The paradigm cases found on representatives illocutionary act types are denying, asserting, and accusing.

- b. The paradigm cases found on directives illocutionary act types are asking, begging, commanding, requesting, prohibiting, suggesting and instructing.
- c. The paradigm cases found on commissives illocutionary act types are committing, predicting, and refusing.
- d. The paradigm cases found on expressives illocutionary act types are complaining, surprising, protesting, amazing, thanking, leave taking, greeting, apologizing, praising, regretting and liking.
- e. The paradigm cases found on declarations illocutionary act types are declaring, approving and naming.

B. Recommendation

Based on the conclusion above, the some recommendations are enclosed as follows:

1. For readers

The readers in general are suggested to be interested and learn about speech act, especially for illocutionary acts and its paradigm cases.

2. For students

The students in general and especially for students of English Education Department of IAIN Ponorogo are suggested to learn more and well understand about speech act, especially for illocutionary acts and its paradigm cases.

3. For teachers
