B. Recommendation

After analyzing the data, the researcher has some suggestions related to the results of the research. They are as follows:

1. For the next researcher, the researcher suggests to add more theories of lexical cohesion and the text of analyzing. Because in the lexical cohesion there are many theories. So the next researcher can apply more than one theory.
2. For the reader, the researcher suggests to be more carefully when the reader read this thesis, in order to avoid the miss understanding.
3. For the researcher, this research was useful to the researcher because, she can learn more about Lexical Cohesion.
4. For the teachers, in this occasion this thesis can give inspiration to the teacher to teach their students use movie as media.

5. For the Institution, can develop the library research and give more facilities related to library research.
6. For the students, can learn more lexical cohesion, that not only found in the written/story text form, but also in a spoken text (dialog of the movie).
